

PABLO IVÁN CHUQUIMIA HUANCA

FRONTEND DEVELOPER | REACT | JAVASCRIPT | OPENAI API

La Paz, Bolivia | +591 79573025 | pablo.ivan.chuquimia@gmail.com
github.com/pchuquimia | linkedin.com/in/pchuquimia

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive web applications with React, JavaScript, Tailwind CSS, REST APIs, and automated testing. Independently developed and deployed Apex Performance, a full-stack fitness platform with Client, Trainer, and Administrator roles and a bilingual catalog of approximately 1,300 exercises. Integrated the OpenAI Images API and Cloudinary, and implemented unit, integration, API, and E2E testing, complemented by desktop and mobile validation with more than 10 beta testers.

TECHNICAL SKILLS

Frontend: React 18/19, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, React Router, responsive design, semantic HTML, and ARIA accessibility.

State management and APIs: Redux Toolkit, TanStack React Query, React Context, Axios, REST APIs, and JWT authentication.

Backend and data: Node.js, Express, MongoDB, Mongoose, MySQL (relational schema design, JOIN queries, and CRUD), and Firebase in academic projects.

AI, UX, and tools: OpenAI Images API, OpenAI Codex, Cloudinary, Figma, Git, and GitHub.

DevOps and cloud (academic): Docker, Docker Compose, Jenkins, GitHub Actions, Huawei Cloud, and AWS fundamentals.

Testing and quality: Vitest, React Testing Library, Jest, Supertest, Playwright, Cypress, and Postman/Newman; unit, integration, API, and E2E testing.

FEATURED PROJECT

Apex Performance (Gym Tracker) | *Personal project* | January 2026 - Present

Live demo: <https://apex-performance-demo.onrender.com/> | **Source code:** available upon request during hiring processes.

- Independently designed and developed a responsive platform for Client, Trainer, and Administrator roles, with 18 screens, 56 reusable components, 87 API routes, and 12 MongoDB models.
- Built a bilingual catalog of approximately 1,300 exercises with muscular and biomechanical taxonomy, instructions, precautions, filters, and multimedia content.
- Improved performance through caching and invalidation with TanStack React Query, pagination, lazy-loaded images, Cloudinary transformations, HTTP compression, and indexed queries.
- Integrated the OpenAI Images API into an administrative workflow, keeping credentials on the backend, enforcing rate limiting, and storing approved media in Cloudinary.
- Implemented 16 passing automated tests: 7 frontend tests with Vitest and React Testing Library and 9 backend tests with Jest and Supertest; configured authentication E2E scenarios with Playwright and Cypress and a Postman/Newman collection covering 6 endpoints.
- Complemented automated testing with manual functional, usability, compatibility, and responsive-design testing on Chrome for desktop and Android and Safari for iPhone, involving more than 10 beta testers.

PROFESSIONAL EXPERIENCE

Saffiro Informática SRL - Junior Information Security Analyst | La Paz, Bolivia | February 2023 - May 2024

- Monitored Windows and Linux servers, network devices, firewalls, links, web applications, and databases using Zabbix and PRTG.
- Reviewed automated backups daily through logs and alerts; identified failures and prepared technical reports documenting root cause, impact, evidence, and applied solutions.
- Supported access administration, firewall reviews, system updates, antivirus/EDR, vulnerability analysis, audits, security policies, and user training under senior supervision.

EDUCATION

Telecommunications Engineering - Universidad Católica Boliviana San Pablo | 2019 - 2025 | *professional degree awarded February 2026*

Diploma in Machine Learning and Data Science - Universidad Privada Boliviana | December 2025 - May 2026 | *completed*

Diploma in Full-Stack Web and Mobile Development - Universidad Católica Boliviana | April 2025 - September 2025 | *completed*

Diploma in Software Testing - Universidad Católica Boliviana | July 2026 - December 2026 | *in progress*

ACHIEVEMENTS AND LEADERSHIP

- National First Place, Huawei ICT Competition - Cloud Computing, Bolivia (2022): contributed to the winning team in cloud services, networking, and storage.
- President, Telecommunications Engineering Student Scientific Society, UCB (2021 - 2022): led academic projects and coordinated student teams.

LANGUAGES

Spanish: Native. **English:** Current B2 proficiency; TOEIC B1 certification.
